

# FOCUS ON YOUR PATIENTS. WE'LL TAKE CARE OF THE OTHER DETAILS.

## People

In a sector where 55% of data breaches are caused by human error, Canon's user-friendly healthcare solutions offer the security you need.

Our multifunction devices, with the added functions of uniFLOW and Therefore minimise the risks of accidental or deliberate Notifiable Data Breaches that result in heavy fines.

With effective training, coupled with Canon's digital solution tailored for healthcare, data breaches involving personal information can be prevented.

## Technology

With 45% of notifiable data breaches coming from malicious attacks, security is a must. Canon's MFDs with uniFLOW & Therefore minimise your risks.

We protect your business from the risks of mobile malware, ransomware, and phishing, that are the greatest security threats in the Internet of Things.

Our intelligent technologies support collaborative healthcare within an environment that protects patient confidentiality and outcomes.

## Process

At a time when 86% of data breaches involve contact information, Canon's compatible digital solutions reduce risk, even in complex BYOD workplaces.

Canon delivers transparency and accountability to underpin good privacy practice within a sector that constantly manages sensitive patient information.

With multi-factor authentication, anti-spoofing controls and password protection, Canon provides the processes you need to keep patient data safe.
