

"We established a relationship with Canon, who have been amazing, particularly in the way they have wanted to partner with us. It's not often that you want to use the word 'partner' with a supplier, but Canon sought to understand us as a college, and design a solution that was going to fit us – and that's exactly what they did."

Paul Connelly, Head of eLearning –
Portside Christian College

"As staff and students get more comfortable with digital, we want there to be more scanning of resources to individual server spaces. Archiving of paper records is also part of the ongoing contract we have with Canon. Whilst many of us may treasure the tactile feel of paper and the ability to annotate and mark it as part of active learning, there's little doubt that Saint Ignatius' students will welcome the college's digital transformation lightening their school bags."

Brett Houghton, Head of Technology –
Saint Ignatius' College Riverview

See the big picture

Sometimes it's hard to see the big picture when you're so focused on the detail and getting the little things working well. Canon helps put your whole school in focus so you can keep doing what you do best.

At Canon, we've built our reputation on seeing the world differently. We value partnering with those who have the same future-facing vision. Just like you, we want to inspire students to ask big questions, engage passionately and have powerful experiences they will carry with them for life. That's why we're working with educators to inspire the future of the world, because it all starts in our schools.

Bright Ideas for Smarter Schools

Get back to what you love

– Less Admin, More Teaching –

There's enough to pack into a busy school day without adding the extra hours of record keeping and compliance. We're here to lighten the load; our digital solutions will remove lengthy paper-based processes and allow you to spend more time teaching.

Canon Document Management Solutions

Safe and simple

Canon can help ensure your systems and data are secure. Using our print device security features and permission based document management systems, you can ensure that your school's most sensitive data is kept safe.

Canon's Filing Assist will make digitisation simple, not only are they scanned, they are named, converted and filed based on rules and information from the document so you can find what you need when you need it anywhere; safe and simple.

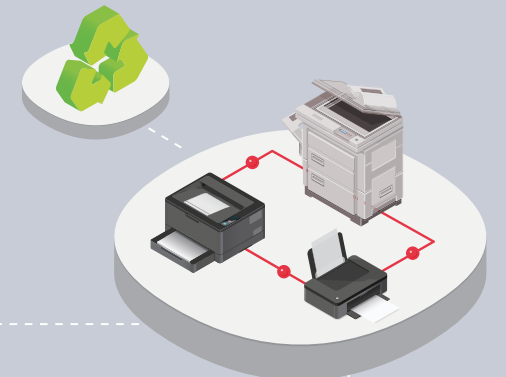

**Canon Print Solutions
Canon Capture Solutions**

Reduce the paper overload

Transform physical documents into digital records, enabling greater accessibility and traceability for your schools documents and data.

**Canon Document Scanners
Canon Document Management Solutions**

See your costs so you can manage them

With the right mix of scanners, printers and software, Canon can help schools improve printing efficiency, reduce and control costs and achieve sustainability goals.

Canon Print and Software Solutions

Be free to focus

We can even take the day to day management of your school devices and printers off your hands. Let Canon design and build your IT environment so you can take the time back to focus on what you do best – running your school.

**Canon Managed Document Services
Canon Business Services**

Do bigger things

Turn up the impact in your classroom with large and colourful visual aids. Not only can you print imaging of the highest quality, but you won't be compromised on cost or space. Experiment and explore from the heart of your print room. It'll broaden your student's horizons while widening your options.

**Canon Large Format Printers
Canon Production Print Solutions**

Go beyond the classroom

Challenge students to see things differently with our range of classroom printers. An English assignment visually enhanced, a science experiment beautifully documented or an art project captured in a split second.

Canon Laser and Inkjet Printers

See the world differently

By utilising the latest photography technology, students are able to express their creativity, engage with classroom material more deeply, and do more than they might have thought possible.
